

EXAM a.a 2025/2026

Module: Database

Anna Monreale

Deadline: 15 May 2026

Consider the Foodmart Database to solve the following queries in SQL:

1. List firstname, surname and occupation of customers in Burnaby with a name starting with "S" and finishing with "a"
2. List the products bought by woman customers with a store cost > 2.00
3. List customers (indicating the firstname, surname, and number of children) who bought products of the category "Fruit" in January 1997 or "Seafood" January 1998.
4. For each store id, provide its country and the number of customers purchasing something in that store. Order the result with respect to the store country.
5. For each customer (id, firstname and surname) provide the total sales.

Each student must deliver a zip file containing:

- 1) .sql file containing for each query (name of the file **SurnameName.sql**)
 - a) the text of the question
 - b) the SQL Command answering the question
- 2) a pdf file containing for each query a), b) and the screenshot of the table returned as result of the query (top rows of the table are enough) (name of the file **SurnameName.pdf**)

Additional instruction for the delivery

- 1) Name of the zip file: **SurnameName.zip** (ex: MonrealeAnna.zip)
- 2) Email address: anna.monreale@unipi.it
- 3) Email subject: [MAIN-DB] Assignment Delivery *Surname Name*
